ABOUT ME

Passionate software developer focused on continuous growth, building impactful projects, and learning modern technologies.

WORK EXPERIENCE

Full-stack Developer Mar 2025 - Present

ALPHA : Alliance of Leading Programmers through Heuristic Adaptation

Developed full-stack web systems using MERN and Next.js, built event registration platforms and student dashboards, created interactive web apps including games and messaging tools, and integrated frontend interfaces with backend APIs and databases.

Back-end Developer Aug 2024 - Mar 2025

ALPHA : Alliance of Leading Programmers through Heuristic Adaptation

Designed and implemented backend APIs, assisted in database schema design, developed server-side business logic and data workflows, and supported authentication, validation, and system security.

Software & IT Developer Aug 2023 - Present

Freelance / Self-Employed

Developed Java desktop applications, built full-stack web systems with database integration, created Bash automation scripts, and provided IT services including OS installation, system setup, and client-based technical solutions.

Engr. Department Intern Feb 2024 - Mar 2024

Infoshift Inc.

Independently built a company website using Vue.js and Tailwind CSS, applied component-based frontend architecture with state management, collaborated with engineering leadership, and followed real-world development workflows including version control and task tracking.

EDUCATION

STI College Ortigas-Cainta Aug 2024 - Present

Bachelor of Science in Information Technology

Cainta Senior High School Aug 2022 - May 2024

TVL/ICT - Computer Programming
